

## Tableau Training project:

- Objective: Help the organization by creating a dashboard to visualize the sales comparison between two selected regions.
- Dataset: Sample Superstore
- Parameters and Calculated fields:
  - Primary and Secondary region parameter with all regions listed.
  - Primary and Secondary calculated field to link parameter to grouped states (i.e., region as the original region variable not recognised on maps, even with hierarchy)
  - First order date calculated field
  - Other calculated fields: Average Sales per Order, Number of Customers, Number of Orders, Number of Products in Sale for region stats and max/min sales for tabular view.
- Tableau public dashboard link:
